STATEMENT OF OBJECTS AND REASONS

Central excise duties are now levied at the rates specified in the Schedule to the Central Excise Tariff Act, 1985 (5 of 1986). The Tariff is based broadly on the system of classification derived from the International Convention on the Harmonised Commodity Description and Coding System with such contractions or modifications thereto as were considered necessary. The Harmonised System is basically of 6 digit code. The Schedule to the Customs Tariff Act, 1975 (51 of 1975) is also based on the Harmonised System. For the sake of uniformity it would be more convenient if the Customs Tariff and the Excise Tariff are aligned to each other. However, full alignment may not be possible because the scope of customs duties and central excise duties are different. It is felt that it would be beneficial to gradually align the excise tariff with the customs tariff which would reduce classifications disputes and also facilitate compilation of statistics. With this object, Chapters 28 to 40 of the Schedule to the said Central Excise Tariff Act have been identified where alignment of the Excise Tariff and Customs Tariff is considered feasible at the 4 digit level.

2. The amendments proposed in the Bill thus seek to align Chapters 28 to 40 of the Central Excise Tariff Act with the corresponding Chapters of the Customs Tariff Act at the 4 digit level with certain minor exceptions. The existing rates of duty are being preserved and the effective rates of duty in certain cases would be provided through the exemption notifications issued under the Central Excise Rules, 1944.

3. Opportunity has been availed of to increase the tariff rate of duty in respect of Polypropylene wastes.

4. The Bill seeks to achieve the above objects.
